

PROTECTION

Tip Protector

- Semi-rigid expandable mesh protects the tip/lens of endoscopes from front and side impact.
- Also for sensitive surgical instruments.
- Allows moisture to escape, eliminating potential bacteria growth
- Will not fall off and is not abrasive/will not scratch any part of the scope/lens
- For use during transport and storage
- Securely fits many different sizes of instruments
- Each case contains 10 packs of 10 (clean) or 50 units (sterile)

Clean or Sterile

Part #	Short Description	Quantity / Pack Size	Product Description	Image

EndoSock™ Scope Sleeve

- Provides a barrier from Physical contact
- Provides a barrier filter from the Environment
- Does not allow moisture build up and the resulting potential bacteria growth from dampness on the insertion tube / wicks moisture away
- Provides a surface for the placement of labels showing detailed scope cleaning information for reference, without having to place the label on the scope body (labels can be easily removed from the EndoSock and placed on a patients chart, etc)
- Does not need to be taped directly onto the endoscope boot

Part #	Short Description	Quantity / Pack Size	Product Description	Image
